Shree Umiya Saksanik Sankul, Rupavati

PROJECTS

Gym Management System (C# & SQL Server) : Built a desktop application to manage gym memberships, payments, and attendance using C# Windows Forms and SQL Server for database handling.

Blood Bank Donor Management System (PHP, MySQL, Bootstrap) : Designed and developed a web application to manage donor registrations, blood requests, and admin controls with a responsive Bootstrap interface.

Online Tiffin Service (Django & SQLite) : Built a web application to manage tiffin orders, subscriptions, and meal plans using Python Django framework and SQLite for database handling.

Blog Website (Laravel, MySQL, Bootstrap) : Developed a full-stack blog platform with authentication, post creation, categories, comments, and admin dashboard. Built a responsive UI using Bootstrap and managed backend with MySQL database.
